

# Go Rebar

Rapid online  
order entry.

## About Go Rebar

Go Rebar is an online order entry system powered by aSa, the world's leading supplier of rebar software. It is a perfect solution for:

- Rebar fabricators - Let your customers order steel online.
- Rebar detailers and contractors - List material and send your files to fabricators.

### Cloud-based

Minimal hardware and system requirements.

Access from anywhere.

Touch and tablet-friendly.

### Fast, accurate, secure

Use any common building code or measurement unit.

List material in a grid with instant error-checking.

### Advanced shape technology

Enter standard and custom bent bars.

Create your own custom bar shapes in seconds.

### Customizable interface

Customize field order and other preferences.

Use your corporate logo and colors.

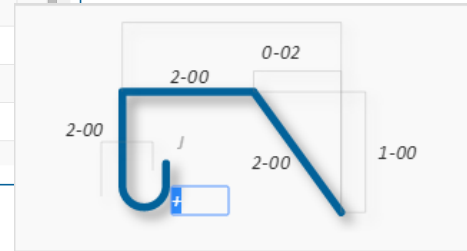

The Complete Rebar Solution®

Element	Quantity	Longest Length (ft-in)		Total Weight (Lbs)
3RD FLR. #1	1	20-00		4,185

Material	Quantity	Coating	Size	Grade	Shape	Drawing	Bar Mark	BCD	Field
Rebar	4	Black	4	60	12		4A178	0-023	
Rebar	15	Black	6	60	14		4A179	0-043	
Rebar	20	Black	5	60	17		AA3	0-03	
Rebar	20	Black	6	60	17		AA5	0-033	
Rebar	30	Black	4	60	2		AA6	0-022	
Rebar	40	Black	5	60	17		AA7	0-03	
Rebar	10	Epoxy	4	60	17		4A002	0-022	
Rebar	5	Black	5	60					
Rebar	10	Black	5	60	17		5A100	0-03	

*Designed to be quick and simple, Go Rebar lets you add material directly in the entry grid and type leg dimensions around the shape you are defining. Elements provide an easy way to group and organize your takeoff lines. As a web application, the system is mouse and touch-friendly, and works with a web browser on nearly any computer or tablet.*

## Fast, flexible, and secure

- Get started in minutes. If you have ever worked with mobile apps or web entry screens, the Go Rebar interface will be familiar and easy to navigate.
- Decide which data columns to display on the screen and to include on your reports.
- Create a variety of reports, including the main Detail report, job listings, customer listings, activity reports, and more.
- Be confident that all your information is secure and private on one of the world's leading cloud data centers.

## Fabricator benefits

- Provide your customers with a fast, accurate, and easy way to order steel.
- Customize Go Rebar to match your corporate branding; use your own color scheme and logo.
- Create a seamless experience. Using the handy widget provided by aSa, your customers can securely log into Go Rebar directly from your company website.
- Keep it simple for your customers. Your system administrator sets up all defaults and permissions; all the user needs to do is log in and enter their lists.
- Import with ease. When a customer creates an order, the file is e-mailed to you. Double click to automatically load it into aSa e<sup>x</sup> for tag creation and downstream processes.

## Rebar detailer and contractor benefits

- Create material lists for fabricators with minimal investment in hardware and software.
- Set up customers, jobs, and contacts in seconds.
- Submit your work easily. With a single click, the system sets up an e-mail and attaches your order. You simply select the receiving contact and click Send.
- Export orders to ADF (aSa Data File), Excel, or CSV (comma separated value). Provide material lists to any fabricator, regardless of whether they use aSa or any other rebar system.
